Software Engineer

SUMMARY

Result-driven software professional with hands-on experience in Continuous Integration and Development (CI/CD), automation, and version control systems. Proven ability to streamline workflows, reduce job run times, and enhance codebase efficiency using modern tools and AI-driven solutions. Adept at debugging, triaging, and maintaining complex systems in high-pressure release environments.

EDUCATION

Vellore Institute of Technology, Vellore

Master of Technology, CSE
2019 – 2021, CGPA: 8.32

Bhilai Institute of Technology, Durg

Bachelor of Engineering, Information Technology
2014 – 2018, CGPA: 7.82

12TH:

Senior Secondary School Sector-7, Bhilai (C.G.)
2012-2014, CGPA: 6.68

10th:

Senior Secondary School Sector-7, Bhilai (C.G.)
2010-2012, CGPA: 7.8

SKILLS

- Language: Python
- Web Technologies: Html, CSS
- Database: PostgreSQL, MySQL, Oracle
- Operating System: Linux, Windows
- CICD Tools: Jenkins, Docker
- Version Control: Git, Perforce, Artifactory

HOBBIES AND INTERESTS

- Cooking, Reading, Painting, Artistic
- Travelling and Adventure Sports

PROFESSIONAL EXPERIENCE

Software Engineer DevOps

AMD (Parent Company: CIEL | Foray Software Pvt ltd | June 2021 – Present)

- Led automation efforts in the CI team, focusing on triaging, debugging, maintenance, and workflow development.
- Managed Git Enterprise and Perforce; automated patch workflows from Git to Perforce, improving efficiency and reducing manual tasks.
- Built and optimized Jenkins pipelines using multithreading and Slack threading to cut down job execution time.
- Upgraded legacy codebases into modern standards, boosting performance and maintainability.
- Contributed to critical release activities, ensuring smooth and timely delivery during high-pressure release cycles.
- Used LLMs to automate Allure test report analysis, enabling faster identification of root causes and proposed solutions.
- Customized and redeveloped the open-source Patchwork workflow to meet organizational requirements, enhancing code review and patch management processes.

Frontend Developer Intern

Xilinx India Pvt ltd (Fulltime) | 2020 - 2021

- Developed a React-based web application to consolidate reports from multiple sources via Django-powered RESTful APIs.
- Brought mock-ups to life with HTML, CSS and JavaScript.
- Delivered high-performing, user-friendly websites optimized for speed, accessibility, and design consistency.

PUBLICATIONS AND CONFERENCES

- Published a journal paper in Machine Vision Inspection Systems, Volume 2: Machine Learning-Based Approaches titled "A Comparative Study of Different Classifiers to Propose a GONN for Breast Cancer Detection"
  Publication: WILEY
  DOI: https://doi.org/10.1002/9781119786122.ch8

- Presented paper in 8th International conference on Frontiers of Intelligent Computing: Theory and Application (FICTA 2020) titled "A comparative Analysis of different Classifiers and proposed genetically optimised neural network."
  Publication: SPRINGER
  DOI: https://doi.org/10.1007/978-981-15-5788-0_61

ACADEMIC PROJECTS:

Title: A genetic algorithm using neural network on optimized data set for early detection of breast cancer
Institute: Vellore Institute of Technology, Vellore
Duration: 4 Months
Description: This project is the enhancement of the project "A comparative study of different classifiers to propose a genetically optimized Neural Network" in which the genetically optimized Neural Network is proposed in this project with respect to the best classifier by taking the input of optimized data set obtained via linear regression.

Title: A comparative analysis of different classifiers to propose a genetically optimized Neural Network
Institute: Vellore Institute of Technology, Vellore
Duration: 4 Months
Description: A comparative analysis of various existing classifiers such as Support Vector Machine, Decision Tree Classification, K-Nearest Neighbor, Random Forest Classifier and Multi-Layered Perceptron is performed in this project to obtain the best outcome out of five for taking one classifier as input for the genetic algorithms. We have also adopted a linear regression approach to optimize the feature selection to send the neural network in genetic algorithm as input datasets.

Title: A comparative analysis using NDVI between the remotely sensed data by Landsat8 and Sentinel-2
Institute: Vellore Institute of Technology, Vellore
Duration: 4 Months
Description: Within this project, comparative research is carried out to analyze the accuracy and impact of satellite images for monitoring purposes within different areas, and for Landsat-8 and Sentinel-2 satellites, the vegetative index is determined for various regions.

Title: Health Assured- The smart health care mobile app
Institute: Vellore Institute of Technology, Vellore
Duration: 4 Months
Description: The main aim of this application is to provide expert-based health care to understaffed remote sites and to provide advanced emergency services to the users of the application. For this project firebase is used as backend database.

Title: Online Paying Guest Portal
Institute: Bhilai Institute of Technology, Durg
Duration: 4 Months
Description: This is a web application used to book paying guest rental accommodation in the proximity of the location of the user developed using PHP and My SQL. Using this website users can easily find PGs located nearby.
